#### **Contents of this file**

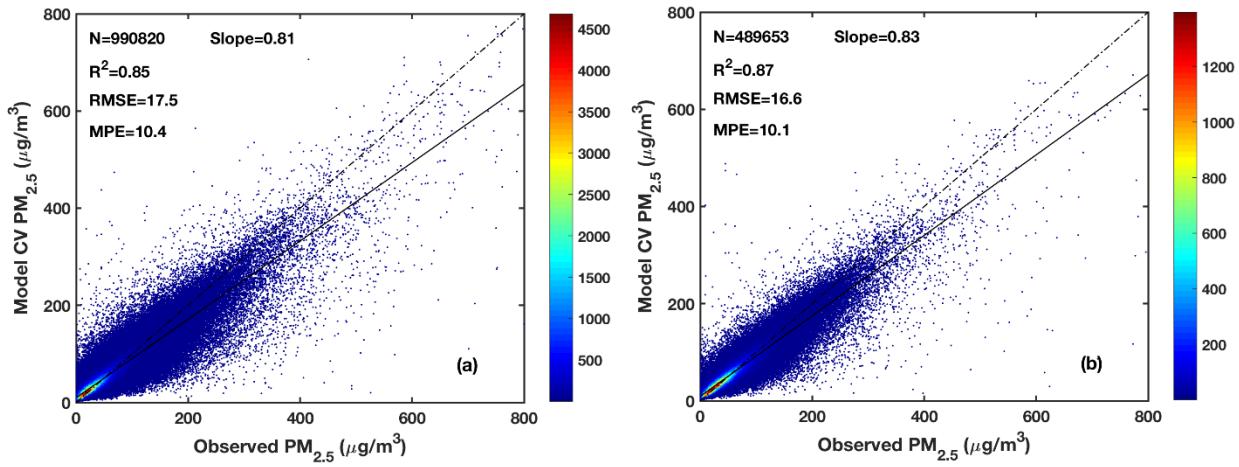

Figure S1, Figure S2, Figure S3 and Tables S1 and Table S2

**Figure S1.** The spatial distribution of PM<sub>2.5</sub> monitoring sites in mainland China in 2016 used in the study.

**Figure S2.** Histograms of the (a) hourly and (b) daily cross-validation biases of the Ref-PM<sub>2.5</sub> model. The percentage of samples in two ranges of bias values are shown in each panel.

**Figure S3.** Cross-validation (CV) results of the Ref-PM<sub>2.5</sub> model for samples (a) with TOA reflectance but without AOD retrievals available and (b) with both AOD and TOA reflectance available. The color bar shows the counts of data points. The dashed line is the 1:1 line. N: number of samples; R<sup>2</sup>: coefficient of determination; RMSE: root-mean-square error of the predictions ( $\mu\text{g m}^{-3}$ ); MPE: mean prediction error ( $\mu\text{g m}^{-3}$ ).

**Table S1.** Descriptive statistics of the Ref-PM modeling variables in the training dataset.

MAM: March, April, May; JJA: June, July, August; SON: September, October, November; DJF: December, January, February

Std: Standard deviation; Max: maximum; Min: Minimum

Ref1, Ref3, and Ref6: Reflectance at 0.47, 0.64, and 2.3  $\mu\text{m}$

P: surface pressure (hPa); T: 2-m temperature (K); RH: surface relative humidity (%); U<sub>10</sub>: 10-m u-wind ( $\text{m s}^{-1}$ );

V<sub>10</sub>: 10-m v-wind ( $\text{m s}^{-1}$ ); TCW: total column water ( $\text{kg m}^{-2}$ ); Ozone: total column ozone ( $\text{kg m}^{-2}$ );

PBLH: planetary boundary layer height (m); NDVI: normalized difference vegetation index

**Table S2.** Pearson correlation coefficients for prediction and all predictor variables.
